

## Modernizing cloud adoption for cloud-native authorizations

# FedRAMP® 20x

FedRAMP 20x offers a cloud-native continuous security assessment that's as simple as your cloud service offering.

## FedRAMP 20x Overview

Modernization begins today. FedRAMP 2025 is a revolutionary approach to how government should engage with industry. We're removing blockers and streamlining processes for simpler, easier and cheaper cloud adoption.

## 2025 Mission

FedRAMP is a government-wide program that sets the standards and policies to galvanize private innovation to create best-in-class secure cloud solutions.

## What's Changing For Cloud Providers

- Agency sponsorship will not be necessary because authorization will be simple
- Use existing security certifications to prove system security standards are met
- Choose what you want to offer and let the agency choose
- Authorizations will take weeks instead of months and years
- Work independently with an agency after cloud offering adoption
- Continuous monitoring will be decentralized and will happen on your terms

## How Cloud Providers Will Benefit

Reducing duplicative efforts and minimizing documentation saves you time and money

Open forum for innovation to deliver cloud services for the American taxpayer

Greater ROI for adding new services to the FedRAMP Marketplace quickly
